

Programme: B E – Common to All Branches
Term: 07-10-2024 to 25-01-2025
Course: Design Thinking
Course Code: AECC17
Date: 05-12-2024
Time: 4.00pm to 4.20pm
CIE: A1 (Quiz)
Sem: I (Sec. M, N, O, P, Q, R, S, T, U, V, W, X)
Max Marks: 10
Time: 20 minutes
COs: 1 & 2
Scheme and Solutions (Each question carries ½ mark)

Q.No.	Question	Answer
1	The first step of Design Thinking process is? a) Ideate b) Empathise c) Test d) Prototype	b
2	Which is NOT a good interview strategy for the Empathy step? a) Encourage the person to talk about experiences. b) Try to uncover needs people may or may not be aware of. c) Ask follow-up questions to get more information. d) Encourage short answers that get right to the point.	d
3	Which is NOT an aspect of the Empathize step? a) Evaluate: Prioritize evidence that supports a chosen problem b) Observe: View users in the context of their lives c) Engage: Interact and interview users in real-life context d) Immerse: Experience what the user experiences	a
4	During which step do you narrow focus to a specific, meaningful challenge? a) Define b) Empathize c) Test d) Ideate	a
5	During which step do you create a physical, interactive representation of your solution? a) Prototype b) Test c) Ideate d) Define	a
6	What is the primary goal of design thinking in education? a) To follow a rigid problem-solving method b) To enhance rote memorization skills c) To foster creativity and empathy in problem-solving d) To teach only technical skills	c
7	What is a critical component of developing a design-thinking mindset? a) Strict adherence to established guidelines b) Embracing ambiguity and uncertainty c) Avoiding failure at all costs d) Prioritizing theoretical learning over hands-on practice	b
8	_____ are characterized by middle-skilled cognitive and production activities; such as bookkeeping, clerical work, repetitive tasks. a) Difficult Tasks b) Non-Routine Tasks c) Routine Tasks d) Innovative tasks	c
9	_____ mindset enable students to be thoughtful and reflective of the work being done, how the work is being done, and how the work will improve. a) Human centered b) Creative c) Being mindful of the process d) Having Bias towards action	c
10	_____ phase of DT involves focusing and learning about the people they are designing for, as well as the context of the design challenge. a) Design b) Ideate c) Empathize d) Prototype	c
11	User's emotional or physical necessities and desires that come in form of verbs are termed as: a) Insights b) Needs c) Statements d) Interviews	b

12	_____ mindset will enable students to communicate and share ideas visually for clarity, understanding and decision-making a) Human centered b) Creative c) Being mindful of the process d) Show don't tell	d
13	_____ is believing one has the ability to come up with new ideas and the courage to try them out. a) Growth mindset b) Creative confidence c) Beginner's mindset d) Improve from failures	b
14	In _____ phase of DT students take action to know, understand, synthesize, and share the feelings, values, and experience of the end user. a) Design b) Ideate c) Prototype d) Empathize	d
15	Remarkable realizations that could be leveraged to better respond to a design challenge are termed as: a) Insights b) Needs c) Statements d) Interviews	a
16	Which of the following best describes design thinking? a) A fixed, step-by-step process b) A mindset that combines creativity, empathy, and iterative learning c) A curriculum focused on technical programming skills d) A management tool for educational institutions	b
17	Why is empathy considered the cornerstone of design thinking? a) It focuses on the creator's perspective b) It ensures solutions are technically feasible c) It prioritizes understanding the needs and emotions of users d) It simplifies complex problems into smaller tasks	c
18	What method is suggested to develop empathy in the classroom? a) Brainstorming solutions independently b) Observing and interviewing users to understand their needs c) Focusing on textbook examples d) Ignoring user feedback to avoid biases	b
19	What is the primary focus during the "Define" stage of design thinking? a) Generating as many ideas as possible b) Clearly articulating the problem based on user needs c) Testing solutions with users d) Building prototypes to explore options	b
20	A well-defined problem statement should: a) Offer a solution upfront b) Avoid framing the problem around user needs c) Include multiple unrelated issues d) Be user-centered and specific	d
