

CIE TEST - MAY 24

Duration: 3hrs

- Answer one full question from each unit.
- Answer Unit -I questions in sketch work only, no computer solution needed
- Unit -2 & Unit -3, Submit both sketch work and computer solutions

Q.N	UNIT I	Marks	COS
1)	A Rectangular lamina of 40mm x 60mm is resting on one of its shorter edges on HP such that the lamina is inclined at 35 degrees to HP and edge on which lamina rests is inclined at 25 degrees to VP. Draw its Projections	10	CO1
2)	Hexagonal lamina of sides 25 mm rest on one of its corners on HP. The lamina makes 45 degrees to HP and the diagonal passing through the corner on which it rests appears to be inclined at 30° to VP. Draw the projections.	10	CO1
UNIT II			
3)	A Pentagonal prism 25mm sides of base and 60mm axis length rests on HP on one of its edges of the base. Draw the projection of the prism when the axis is inclined to HP at 45° and appears to be inclined to VP at 40°.	20	CO2
4)	A Square pyramid 35 mm side and 60 mm axis length rests on HP on one of its edges of base which is inclined to VP at 30°. Draw the projection of the pyramid when the axis is inclined to HP at 45°.	20	CO2
UNIT III			
5)	A Sphere of 40mm diameter is placed centrally on the flat face of a hemisphere diameter 60mm. Draw the isometric projection of combination of solids	20	CO3
6)	Draw the isometric projection of a cylinder of 50 mm diameter and 60mm height on top of which a cone of 50 mm diameter, 60 mm height is placed centrally.	20	CO3
